

Get Cool, Fresh & Healthy Air With

*Summer Coolers*

NEW EDITION 2023

## About

**I**t's the quest for excellence that's never ending. It's this quest that makes one go the distance.

This penchant for quality and excellence has always been at the core of Goyal Coolers that began its illustrious journey way back in 1991. Led by the astute vision of Late Shri Madan Lal Goyal, the entity took wings with a futuristic outlook and strong technological skills transforming Goyal Cooler into a renowned brand to be reckoned with.

Taking forward this famed legacy, Jawahar Lal & Kuldeep Goyal have brought about a world of change in the product portfolio by adding Almirahs as one of the coveted product in the brand portfolio. This pivotal turn of events has turned significant with Goyal Almirah creating a favorable product affinity

that has carved a niche with its contemporary, functional and an unmistakably stylish finishing. This is reflective of the characterization of the company, which advocate the usage of sophisticated machine tools and latest generation production technologies of metals.

This comes at the production facility which is spread around 1.25 Lac sq.ft. replete with imported machinery such as CNC, Automatic laser cutting and manned by qualified and experienced professionals whose presence has accelerated the growth process of the company by many notches. All the metal parts undergo a treatment in tanks dedicated to the various Goyal metal finishes in order to guarantee an excellent result in terms of gloss, matt and uniformity. The Marble, metal, and colour shades represent Goyal's penchant for materials par excellence. They are different one from each other in texture and colour, come from various areas, are carefully selected and processed with cutting-edge technologies, the materials are machine finished by skilled workers and treated with special stain-resistant products to ensure perfect maintenance. All these process finally translated into finely finished products which bear the stamp of the company's resolve for nothing but the very best.

Energy Efficient

Metal Tank ensures durability

Anti-corrosive powder-coated body

Honey pad insulation for cool air for a longer period

Compact design
